DETAILED ACTION

1. The response filed on March 9, 2009 has been entered. Upon further consideration, new rejections have been made which were not necessitated by applicant's amendment. Accordingly, this Office action is being made **non-final**.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the specific structure to simultaneously drive the knives and to provide the knives with different stroke lengths including the specific structure of the drive components including the rotor means, the coupling means and the rotating drive means must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112, 1st paragraph

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The disclosure does not provide sufficient support for the invention as claimed, particularly for the drive structure of the cutting device. For example, the specific structure to simultaneously drive the knives and to provide the knives with different stroke lengths is not sufficiently disclosed and thus the description does not clearly allow persons of ordinary skill in the art to recognize that the present inventors invented what is claimed. Further, the figures, particularly Figure 5, do not clearly illustrate the structure to perform the claimed functions. As a further example, the specific structure

of the drive components including the rotor means, the coupling means and the rotating drive means are not sufficiently disclosed, and thus it is not clear as to how they interact with one another as well as how they act together to drive the knives. Thus, the specification does not convey with reasonable clarity to those skilled in the art that, as of the filing date sought, applicant was in possession of the invention. It has been held that an applicant shows possession of the claimed invention by describing the claimed invention with all of its limitations using such descriptive means as words, structures, figures, diagrams, and formulas that fully set forth the claimed invention. *Lockwood v. American Airlines, Inc.*, 107 F.3d 1565, 1572, 41 USPQ2d 1961, 1966 (Fed. Cir. 1997).

Claims Not Rejected Over Prior Art

5. Claims 1-14 are considered to read over the prior art of record because the prior art or record does not teach or suggest the combination of features as claimed. However, these claims **cannot** be considered to be "allowable" at this time due to the rejection(s) under 35 U.S.C. 112, 1st paragraph set forth in this Office action. Therefore, upon the claims being rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112 set forth in this Office action, further consideration of these claims with respect to the prior art will be necessary.
